About Me

I am a graduate of the Diploma IV (D4) in Informatics Management from Politeknik Negeri Sriwijaya, with a focus on backend development and software systems. I have experience as a Backend Developer at Bank Sumsel Babel, contributing to the development of monitoring systems, back-office applications, employee performance evaluation systems, and supporting applications for banking operations. I am experienced in using Go and Python to develop applications and RESTful APIs, as well as PostgreSQL and Redis for data management. I am also familiar with Docker, Celery, MinIO, and various software development tools. Previously, I participated in the Kampus Merdeka MSIB program at PT Ruang Raya Indonesia, specializing in Back-End Engineering, and developed a Laravel-based application during my internship at Perumda Tirta Musi Palembang. I possess strong analytical and technical problem-solving skills and am committed to developing structured, efficient, and maintainable software solutions.

Experience

Bank Sumsel Babel – IT Division (TSI)

Backend Developer | Karya IT Internship Program

July 7, 2025 – July 6, 2026

- Developed a branch employee performance evaluation system covering customer service, tellers, security personnel, branch facilities, restrooms, ATMs, and other operational aspects.
- Developed back-office systems using Go and monitoring applications using Python.
- Developed a mobile banking back-office system covering access control management, approval and rejection workflows, customer registration, and mobile banking issue handling.
- Developed a helpdesk performance evaluation system by retrieving and processing data using Python and Celery.

Bank Sumsel Babel – IT Division (TSI)

Backend Developer | Karya IT Internship Program

July 7, 2026 – Present

- Developing the Budaya PACAK evaluation and monitoring application to support the implementation of the corporate culture program within the HCL Division.

PT Ruang Raya Indonesia

Back End Engineering | Program Kampus Merdeka MSIB

February 16, 2023 – June 30, 2023

- Participated in the Back-End Engineering competency development program through Kampus Merdeka MSIB.
- Strengthened backend development skills using Go, API development, database management, and software development practices in a collaborative environment.

Perumda Tirta Musi Palembang

Intern | Corporate Secretariat (Sekper)

September 2023 – January 2024

- Completed an internship in the Corporate Secretariat department, achieving a final evaluation score of 8.7 with an A (Excellent) rating.
- Received positive evaluations in discipline, teamwork, initiative, diligence, responsibility, attitude, and work performance.
- Developed a Laravel-based electronic archive (e-archive) application as a final internship project to support digital document storage, organization, and retrieval.

TECHNICAL SKILLS

- **Bahasa Pemrograman:** Go (Golang), Python, PHP
- **Backend Development:** RESTful API, CRUD Operations, Middleware, Authentication & Authorization, Request Validation, API Integration
- **Database & Data Management:** PostgreSQL, Redis, SQL, Database Design & Relationships
- **Framework & Library:** Echo, Laravel, Celery
- **Tools & Infrastructure:** Docker, Postman, DBeaver, MinIO
- **Software Development:** Debugging, API Testing, Error Handling, Git Version Contro

SELECTED PROJECTS

1. Sistem Back-office and Monitoring Budaya PACAK

Technologies: Go, Python, PostgreSQL, Redis, Docker, MinIO

- Developed RESTful APIs to support data management and operational processes within the back-office system.
- Implemented authentication, authorization, user management, role and access control, and data validation.
- Developed modules for managing work units, periods, period extensions, holidays, activity targets, agendas, and approval workflows.
- Developed monitoring and evaluation applications to support the implementation of the Budaya PACAK program and monitor operational performance.
- Implemented user activity logging and file storage integration to support monitoring requirements and document management.

2. **Branch Employee and Helpdesk Performance Evaluation System**

Technologies: Python, Celery

- Developed a branch employee performance evaluation system covering customer service, tellers, security personnel, branch facilities, restrooms, ATMs, and other operational aspects.
- Developed helpdesk data retrieval and processing workflows using Python and Celery to support operational performance evaluation.

3. **Mobile Banking Back-Office System**

Technologies: Go, RESTful APIs

- Developed backend functionality to support user management and access control for administrators and supervisors.
- Implemented approval and rejection workflows for submitted requests.
- Developed features to support customer registration by Customer Service representatives and tellers, as well as mobile banking issue handling.

EDUCATION

Politeknik Negeri Sriwijaya

Diploma IV (D4) in Informatics Management | 2020–2024

GPA: 3.70/4.00

Final Project: Developed a Laravel-based application for managing and distributing job vacancy information at the Department of Manpower, helping connect job seekers with companies.

ACHIEVEMENTS AND CERTIFICATIONS

Entry-Level Web Programmer

Professional Certification Institute (LSP), Politeknik Negeri Sriwijaya | 2024–2027

Java Programming – Private Course

PalComTech | 2025

Academic Achievement Scholarship – Penukal Abab Lematang Ilir (PALI) Regency

Recipient of an academic achievement scholarship awarded by PALI Regency | 2024
